

CAMS User's Conference - June 11, 2002

Recognition of End- Serviced by the NIST Financial Service Group

The following NIST employees and bureau employees that are serviced by the NIST Financial Service Group are being recognized for their contributions to the successful implementation and use of the Commerce Administration System. They have provided their support, knowledge, and dedication to using the system to the fullest during the implementation and going live on the system at the beginning of FY01. The project would not have been successful without there help and willingness to accept/embrace the changes that the CAMS system brought to their work environments. Congratulations to all of you!
